

TARGET your decisions in fewest clicks

Analytic Lessons in the Cloud, about the Cloud

Presented by

Dr. Morten Middelfart, TARGET CTO

WhoAml

- Born 1970 (41 Years –still)
- Shaped by:
computer games, c64, hiphop, army, skydiving
- and of course helping **308,310 users** making better **business decisions** since 1996.

Cloud Intelligence

- Business Intelligence in the Cloud?
- Reporting, OLAP, and data mining?
- Big Data, NoSQL database modeling, storage, data localization, security and privacy, performance, cost and usage models???

Changes in the Cloud

From How
to Who

Changes in the Cloud

But also
Why

Lesson 1

From Control to No Control

From Control to No Control

- Business Intelligence (BI)
Reporting, OLAP, and data mining
on data that are under our control.
- “Analytics” starts where BI ends
Typically data will not be under our control.

From Control to No Control

- No control over availability
- No control over quality
- Tipping point for me

For the past two months I have been doing more Analytics (of cloud data) than BI.

From Control to No Control

Do you Fear Change?

Lesson 2

Beating Fear

What is Fear?

What is Fear?

<http://www.ted.com> Kevin Slavin argues that we're living in a world...

It's a War

- Algorithms are already influencing (defining) structured data
- Scoring – the one number analysis
Credit Score, Klout -> Profiling
- Algorithms are moving into unstructured, uncontrolled data too...

It's a War

Algorithms may not outsmart you,
but they will exhaust you...

The Eye Doctors Story

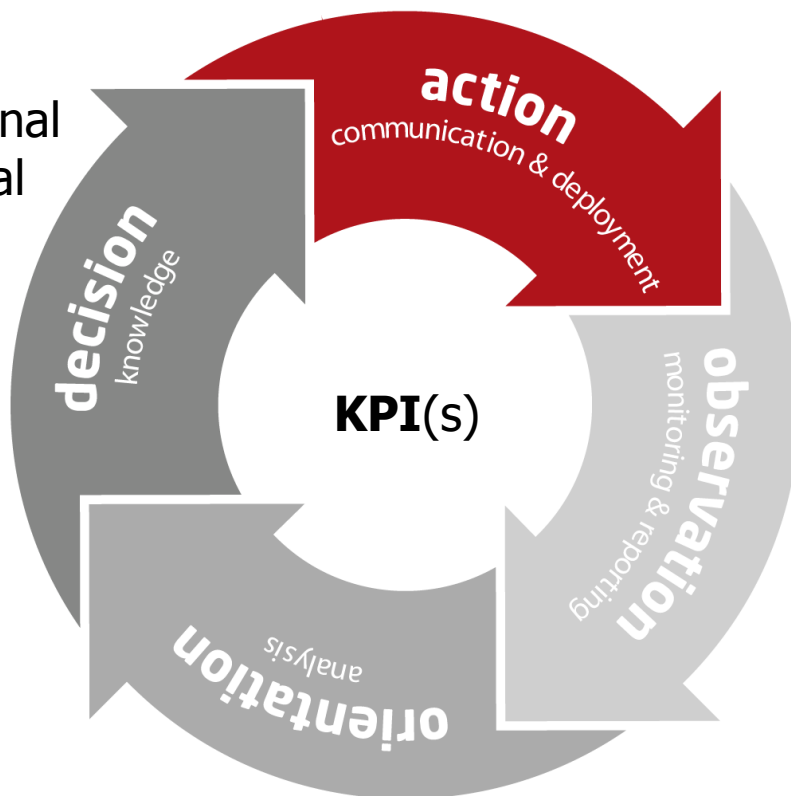

Autonomous Loops are possible Today !

It's a War

- Computers can semi- or fully guard our back
Primarily Controlled Data
- Humans can dedicate themselves
Cloud Analytics on Uncontrolled Data
- What do (not just my own) customers prefer?
Which opinions are trending? Etc.

"Big Data"	
Yet another reason worry about surveillance of your activities in Internet: it is cheap http://t.co/eIEdHzdv #dpi #bigdata	#dpi
yay, biodiversity dark data use depends on geosciences big data generation #ltr2012	#ltr2012
-www.securitytube.net: (Bside - : Big Data's Fourth V: Or Why We'll Never Find The Loch Ness Monster http://t.co/wrRA1mY9) #security	#security
WOW...#Analytics can now be used predict where violence will occur in Afghanistan & the level of its intensity http://t.co/jHTq9T0w	#analytics
Words I don't want to read tweets about: "disruption," "white space," "big data," "infographic," "the cloud." #obfuscation	#obfuscation
Woot ! @NickStepanovich only if leadership defaults Big Data trends, if #BigData illuminates Big Thinking then a powerful differentiator	#BigData
Why Big Data for Healthcare is Rubbish http://t.co/9H1XO4up # healthcare #doctors #socialmedia	#doctors

It's a War

- The arms race has just begun
- The tipping point in focus is yet to come for most organizations; but it will!
- Changes apply to:
Accept less control, less quality -> new truths
Scary! ;-)

Most Popular Groups

- YouGov

Our Learning based on 3 clouds

- Analysts seems to be the ones that pick up
Not as social as expected
- Data tend to be "born in the Cloud"
Less uploading of local data

Our Learning based on 3 clouds

The Cloud Application is being applied much more analytical*, and is thus a difference use case from traditional Business Intelligence.

*) definition used in this presentation

Evolution of Cloud Analytics & BI

- Scoring –the World in One Figure

The one figure interface

Ideal for small mobile screens

- Autonomous Algorithms

The Non-User Interface, or notification only

Consequence of bigger and faster data
