During 2011, there are 281,352 visits over the Tanagra website, **770 visits per day on average**. There are two peaks in the year: in November (1010 visits daily) and March (811). July is the least prolific (542 visits daily).

From one year to the next since 2008, the number of visitors has increased by (about) 100 visits per day on average.

The seasonal pattern is the same: strong activity in March and November, less visits during the summer (northern hemisphere, July-August).

The most of the visitors come from France and the Maghreb.

Then, because some pages are in French (some pages are exclusively in French: free e-books, free on line course materials,...), many visitors come from French-speaking countries, among others from African Francophone countries.

Among the other countries, we observe mainly USA, India, UK, Italy, Brazil,...

Which pages are visited?

(5) and (9) French web portal, with many links to interesting websites about Data Mining (course materials, tools, datasets,...)

(7) and (11) Tutorials in French and in English. I remind that I show how to perform the Data Mining processes with Tanagra, but also with other tools such as [Knime](#), [Orange](#), [R](#), [RapidMiner](#), [Weka](#),...

(3), (4), (10) and (12) Tanagra website in French and in English, with the access to the download pages. I do not know exactly how many people use really Tanagra. But this information is not really important. My main preoccupation is to provide a certain point of view about the Data Mining. It is complementary to the other perspectives. So, the user can choose the tool which is the most appropriate according to its aim and its dataset.

What about 2012?

The same things, with more tutorials again, more free e-books, more on-line course materials,...
